Professional Summary:

Software Engineering student with hands-on experience building and deploying full-stack applications using ASP.NET Core, React, Docker, Kubernetes, and Azure. Strong background in Python, data analysis, and web development through dual emphasis in Data Science and Web Development. Proven ability to collaborate in agile teams, support CI/CD pipelines, and communicate technical concepts clearly through teaching and leadership roles.

Work Experience:

Business & Technology Development at EIS Forensic | May 2026 – Present | Centerville, Utah:

- Lead strategic communications and client relationships to maximize company visibility
- Design company website with React and ASP.NET Core, implement cloud architecture
- Develop internal tools to improve efficiency and streamline client communication
- Integrate AI solutions, build CI/CD pipelines, and expand LinkedIn presence

Software Engineering Internship at Dynamic Integrations | Sep 2024 – May 2025 | Ephraim, Utah:

- Gained hands-on experience with Docker for in-development testing with databases.
- Worked with clients to refine software requirements and presented projects to potential customers at a convention.
- Developed skills in explaining technical decisions and project contributions clearly to diverse audiences.

Education:

Software Engineer Bachelor's Degree | Snow College - Ephraim, Utah (2024 - 2026)

Projects Experience:

ITIN - Itinerary & Trip Planner | In Development (Aug 2025 - May 2026)

- Worked in a four-developer team, implementing an AGILE / SCRUM environment, gaining experience as a SCRUM MASTER
- Hands-on experience as a full-stack developer, Back-end in C#, Front-End in React, and Database with PostgreSQL
- Implemented Local deployment (Docker), Kubernetes deployment for testing, and Production deployment in Azure.

Spotify Agent - Spotify AI Manager | Developed (Aug 2025 - Dec 2025)

- Implemented a CI/CD pipeline for autonomous testing, linting checks, and deployment to testing environment and production
- Implemented Artificial Intelligence as an Agent to manage Spotify accounts based on user input, implemented the Agentic loop.
- Experience with Authorization and Authentication using OAuth.

Consilium - Student Planner App | Developed (March 2025)

- Developed using .NET MAUI, implemented with ASP.NET CORE API and PostgreSQL Database
- Spearheaded multiple rounds of structured user testing to evaluate the application's usability.
- Worked integrally with a dynamic, four-developer team in an agile environment.

Jellyfin - Free Software Media System | Contributed (September 2025)

- Worked with a legacy codebase, using multiple tools to understand existing software.
- Used AI agentic tools for development, reviewing, and testing.
- Submitted code for review and worked with other devs for code correction and deployment to the main app.

Leadership Experience:

Resident Director at Snow College (Aug 2025 - May 2026):

- Campus Security Authority, reporting any broken policy, law, or concern that occurs on campus.
- Mediate when trouble between residents occurs, report to the Dean of Students or Dispatch
- Team Lead for the Resident Assistants, organizing and running meetings throughout the agenda
